

SNOWDOG® PRO

Long Track B13 MER

We have been producing Snowdogs with short and medium-sized tracks for more than 5 years. This experience helped us to make a new Snowdog Long Track. Compared to standard Snowdog models, it has longer frame and bigger luggage compartment. Deep snow performance was enhanced by trolley-slider suspension and front-drive transmission. As every other PRO-series model, Snowdog Long Track has enriched equipment, new design and modern features. This allows for comfortable and safe deep snow ride.

FEATURES / SPECS

SNOWDOG LONG TRACK FEATURES:

1.

131 inch long, 20 inch wide track.
2.

3 cubic feet luggage compartment allows to carry bigger load.
3.

New trolley-slider suspension enhanced deep snow performance. Can be used with sliders removed.
4.

Openable hood for easy engine and transmission maintenance.
5.

Wide handlebar makes the steering easier and enlarges the luggage compartment.
6.

Heated grips are controlled with a handlebar switch and ensure the ride will be comfortable.
7.

Snowdog Long Track comes with handguards which protect user's hands against tree branches and cold wind.
8.

Headlight is located on the hood's top for better lighting.
