

SNOWDOG®

Sport B13 MER

New Snowdog Sport model with attractive design.

The opening hood is made of frost-resistant plastic, providing quick access to the engine compartment.

Heated handles, handguards, safety killswitch, 12V socket and large plastic box in the luggage compartment are included in the standard equipment.

FEATURES / SPECS

SNOWDOG SPORT FEAUTURES:

1.

Openable hood for easy engine and transmission maintenance.
2.

Wide handlebar — makes steering easier and enlarges the luggage compartment.
3.

Heated grips that are controlled with a handlebar switch and provide maximum comfort while operating the Snowdog.
4.

Handguards which protect user's hands against tree branches and cold wind.
5.

Luggage compartment has a plastic box protecting the load from snow.
6.

Headlight is located on the hood's top for better lighting.
7.

Deep snow performance can be improved by means of installation of sliders (option).
